EXPERIENCE

National Service Scheme (NSS)	Mumbai
<i>Volunteer</i>	<i>Jan 2025 – Present</i>
- Partnered with the Afroz Shah Foundation for multiple Versova beach clean-ups, advancing community environmental goals. - Completed a seven-day residential NSS camp at Palghar, working with local communities to understand rural challenges and social issues. - Conducted educational activities for school children and performed awareness skits for villagers on social issues. Attended leadership and personality development sessions and collaborated effectively as part of a team throughout the camp.	

PROJECTS

ReCon – Intelligent PDF Reader	<i>March 2026 - Present</i>
- Built an AI-powered PDF reader using the MERN stack with Google OAuth 2.0 authentication, persistent document history, and bookmark resumption. - Implemented semantic search by generating text embeddings via Hugging Face and storing them in Pinecone, enabling fast similarity-based retrieval across documents. - Developed a RAG pipeline using Pinecone and Groq LLM to provide personalized insights and cross-document semantic recall from users' previous highlights.	
Web Music Streaming Application	<i>Dec 2025 - Present</i>
- Developed a Spotify-inspired web music streaming application using HTML, CSS, and JavaScript. - Implemented dynamic playlist and song fetching from local file storage. - Built core audio playback features including play/pause, seek bar control, mute/unmute, and real-time track updates. - Designed a responsive and interactive user interface to enhance user experience across devices.	
LifeLink - Web-Based Blood Donation & Donor Matching Platform	<i>July 2025 - Present</i>
- Built a web-based platform for blood donation management, enabling donor discovery, blood availability tracking, and appointment scheduling. - Implemented real-time geolocation-based donor matching using Leaflet.js to support emergency blood requests. - Integrated secure authentication and an admin dashboard for efficient management of donors, blood banks, and requests. - Developed a responsive UI using HTML, CSS, JavaScript, and backend APIs to enhance accessibility and community engagement.
